

BOLL FILTER CORPORATION appoints Goltens as authorized filtration solution distributor

27 May 2026

Miami, FL / Houston, TX – Goltens Worldwide's US stations in Florida and Texas have been officially appointed as authorized distributors for BOLL FILTER CORPORATION, a globally recognized leader in advanced industrial filtration solutions technology.

The appointment further strengthens Goltens' ability to support customers across the marine and power-generation sectors in the region with best-in-class filtration systems and lifecycle support services.

With a strong operational footprint in Houston and Miami, Goltens brings decades of experience serving leading shipowners, operators, and power producers throughout North America, the Caribbean, and Latin America. The company's long-standing relationships with top-tier maritime and energy customers position it as a trusted partner for mission-critical equipment and services.

This partnership with Goltens represents an important step in strengthening BOLL's regional presence and service capabilities," said Mike Mews, President of BOLL FILTER CORPORATION. "By combining our advanced engineered filtration technology with Goltens' strong local footprint and service expertise, we are well positioned to deliver enhanced value, reliability, and performance to customers across the marine and power-generation sectors."

Roy Strand, COO of Goltens Worldwide, added: "We are proud to expand our partnership with BOLL FILTER CORPORATION and represent their market leading filtration technology to our customers across the region. Over 86 years, Goltens has built deep, long-standing relationships with leading maritime operators and power stakeholders, and this allows us to further enhance the value we deliver by offering proven, market-leading filtration solutions backed by our global service capabilities."

BOLL FILTER CORPORATION is internationally renowned for its high-performance filtration solutions designed to protect engines, turbines, and critical systems while ensuring operational efficiency and environmental compliance. Its product portfolio includes automatic and manual filters for fuels, lubricating oils, cooling water, and industrial fluids – widely regarded as among the most reliable and technologically advanced solutions in the market.

Through the partnership, Goltens will distribute BOLL FILTER CORPORATION's filtration products, integrating them into its broader portfolio of engineering, repair, and retrofit solutions.

The portfolio complements Goltens' comprehensive service offering, which includes in-place machining, engine services, electrical and control systems, and turnkey retrofit solutions. Customers will benefit from the addition of a trusted partner capable of delivering both advanced equipment and expert execution.

"The agreement also underscores Goltens' continued commitment to providing customers with high-quality, reliable solutions that improve performance, extend equipment life, and support increasingly stringent environmental and operational requirements," Strand concluded.

About BOLL FILTER CORPORATION

BOLL FILTER CORPORATION is a global leader in industrial filtration technology, offering advanced solutions for marine, power generation, oil & gas, and industrial applications. Known for its engineering excellence and product reliability, BOLL FILTER CORPORATION delivers filtration systems that protect critical equipment and optimize operational performance. www.bollfilter.com
