

VGP COMPLIANCE SAMPLING

VGP Sampling kit

If your ship visits a US port, you are required to have a Vessel General Permit (VGP) for water discharge. The VGP 2013 mandates testing of the water before discharge. Non-compliance can lead to high fines by the USCG.

Explore our range of testing kits designed for various types of discharged waters:

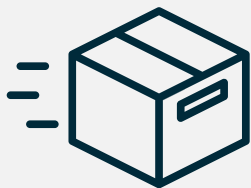

- Ballast Water
- Scrubber Water
- Bilge Water
- Grey Water
- Fresh Water

Note that 'Fresh Water, while not part of VGP, is important to test for quality assurance.

Ensure compliance and start ordering your VGP sample kit today! [click here](#)

How it works?

Order your sampling kit

Get Your VGP Compliance Sampling Kit Today!
Our testing kit is compact and lightweight, making it easy to store on board. Simply order yours and have it ready for whenever you need to take a sample.

Collect your sample

Easily collect water samples following the detailed instructions provided, which can be followed by your own personnel, and send your sample back in the same packaging it came in.

Receive your report

You can securely access your compliance report through a online portal, ensuring that it's easily available.
