

Goltens UK Ltd.

Trading Division

Goltens UK Ltd. has an in-house Trading division that specializes in the supply of marine spare parts and equipment, in line with the high quality maintained by the Goltens brand.

Our scope of supply includes a wide range of slow and medium speed engine spare parts, turbocharger components, galley & laundry equipment plus a vast range of ship's equipment and spare parts.

Slow Speed Engine Spare Parts

Drawing on experience gained over seventy years, Goltens UK Ltd supply the highest quality OEM level spares for the world's most popular range of two stroke marine diesel engines.

All spare parts such as Cylinder Liners, Cylinder Covers, Piston Crowns, Piston Skirts, Exhaust Valve Spindles and Exhaust Valve Seats are all sourced from Genuine and OEM suppliers in Japan, Korea and Europe.

Miscellaneous smaller parts are sourced from OEM suppliers globally.

Medium Speed Engine Spare Parts

Goltens UK Ltd supplement our two stroke spare parts range by also supplying Genuine or OEM level spare parts for a wide range of Medium Speed engines, viz:

Wartsila, MAN-B&W, HiMSEN, Daihatsu, Yanmar, Bergen, Cummins, Caterpillar, MaK, Deutz, MWM, SKL, Niigita, MTU.

We also supply spares for and replacement **Maihak** engine indicators.

Goltens G Pump

The Goltens G Pump is the chosen high pressure pump for bolt tensioning and high pressure jacking, etc. The pump is available in 1400, 1700 and 2800 bar ratings.

Pumps are most of the time available to ship from stock.

Veolia Water Technologies GmbH

RWO  **VEOLIA**

Waste Water Technology

Over 40 years of experience in Total Water Management in areas encompassing:

Oil / Water Separation
Sewage Treatment
Reverse Osmosis
Ballast Water Treatment Systems

As the exclusive UK Distributor for Veolia Water Technologies, Goltens UK Ltd, can supply Equipment and Genuine spare parts.

Teamtec a.s.

Teamtec Incinerators are the ultimate solution for waste treatment onboard vessels, offshore units and onshore facilities.

Teamtec offer a wide range of models and versions cover capacities from 190000 kcal/h to 1290000 kcal/h. Incineration of liquid and solid waste is considered to be an environmentally friendly way of waste management.

As non-exclusive UK representative for Teamtec, Goltens UK Ltd, can offer for new equipment and Genuine spare parts supply.

Wencon ApS

WENCON is a worldwide operating company specialised in solutions for the rebuilding, protection and life extension of metal exposed to corrosion, galvanic corrosion, cavitation, wear or breakage. The Wencon repair concept is widely used in the marine and the offshore industry.

Wencon's competences range from emergency and temporary repairs with the well known Wencon Repair Kits to on-site repair and maintenance made by the crew, and solutions done by Shipyard or Wencon certified Workshop partners.

As the exclusive UK distributor for Wencon products, Goltens UK Ltd, can offer recommendations for repairs and delivery of products - usually from stock.

Neuenhauser Kompressorenbau GmbH (NK)

Neuenhauser Kompressorenbau GmbH (NK) - the major marine air systems technology provider since 1986 following the take-over of the entire compressor manufacturing program of Jos. L. Meyer.

Offering a choice of Air or Water Cooled, 2 or 3 stage piston type compressors with working pressures up to 60bar. Also Starting Air Receivers for storage of compressed air for the starting of 2 and 4 stroke diesel engines, gas engines and gas turbines. Standard sizes of 30 to 2500 L volume at 30 bar working pressure

White-metal Bearing Repairs

Goltens UK Ltd. offers a dedicated white metal bearing repair service where the necessary tools, equipment and experience are on hand to offer customers the service and quality often demanded in the marine and offshore repair market place.

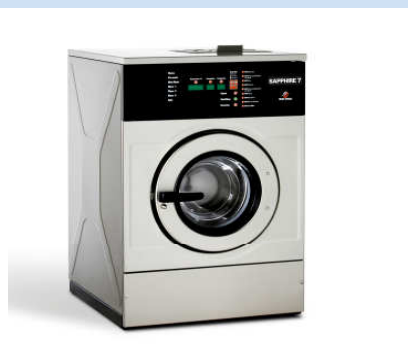

Unexpected shutdowns and breakdowns of equipment can require repairs to be completed in as short a time as possible. For small items, 24 hours turn-around can often be achieved.

Galley and Laundry Equipment

As a consequence of our close association with Shipyards and equipment principals, Goltens UK Ltd has gained many years experience with the supply and installation of Galley & Laundry equipment in marine and offshore environments worldwide.

Equipment for full Galley layouts such as Ranges, Combi Ovens, Tilting Kettles, Bratt Pans, Bains Marie, Ovens, etc. can easily be supplied in specifications to suit the marine and offshore sectors.

Heavy duty Washing Machines, Tumble Dryers and Rotary Ironers form the basis of our Laundry portfolio. This equipment can be supplied in most capacities (Kgs/lbs and Electrical requirements).

General Ships Equipment

Deck Machinery (Winches, Windlass, Anchors and Chain), Air Compressors , Electric Motors, Ships Lighting, Hydraulic Motors, Pumps, Starter Motors, Lub and FO Filters, Hydraulic Equipment, Fresh Water Generators, Air Coolers, and many more.
