

Goltens Dubai and Goltens Singapore Appointed as Value Added Reseller for L & S Electric, Inc.

May 26, 2021

L & S Electric Inc. (L&S), headquartered in Schofield, Wisconsin, has appointed Goltens Company Ltd., Dubai Branch, and Goltens Singapore Pte. Ltd. as value-added resellers (VAR) for the Middle East and the African continent as well as the countries of Singapore, Bangladesh, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Thailand, Vietnam, Australia, India, South Korea, Nepal, New Zealand, Pakistan, Sri Lanka, Taiwan.

The appointment covers L & S' lines of Governor Distributing Valves and Control Manifolds, Governor Hydraulic Systems and Pressure Accumulators for control of Hydroelectric turbines as well as Static and Brushless AVR/Excitation systems used on both synchronous generators and motors for any applicable rotating equipment.

With the addition of L & S' product portfolio to Goltens' existing product portfolio, Goltens is able to provide full system integration and complete turnkey retrofit solutions for its customers' engine and turbine power plants. Goltens is already established as a leading service provider in these markets including overhaul and refurbishment of prime movers, generators, motors and balance of plant equipment. By leveraging these combined capabilities, and the addition of L & S products, Goltens is able to provide complete service contracts as well as refurbishment and upgrade services.

Goltens Worldwide President, Sandeep Seth, notes "We are excited to be working with L & S Electric. Strategic representation of L & S products will further consolidate Goltens' **Energy Control Solutions** products and services. L & S products fill a gap in our product and service offerings and allow us to bring full turnkey solutions to our customer base. These solutions might include the upgrade of any of the following systems: governor and actuator, independent overspeed system, complete prime mover safety and monitoring systems, generator protection, AVR/Excitation and power management with HMI, SCADA and balance of plant as required."
